DETAILED ACTION

Response to Amendment

1. The amendment filed June 27, 2007 overcomes the rejections set forth in the previous Office Action (mailed April 11, 2006).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 16 and 44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 16, the moiety " $(\text{CH}_3)_2\text{CH}_2\text{CH}_2-$ " is missing a carbon atom. It appears that the moiety " $-\text{C}(\text{CH}_3)_2\text{CH}_2\text{CH}_2-$ " was intended. In claim 44 the definition of dme as "dimethylethane" is incorrect, it should be dimethoxyethane. See first line after the formula (VII) in claim 44.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 19, 20 and 23 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Ciszewski et al., Dalton Trans., pages 4226-4227, published on the web 09/25/2003. The reference discloses the formation of a ortho-nitrobenzene derivative which upon reduction conditions produces an aniline derivative of the formula 1. See

Art Unit: 1621

Scheme 1 at page 4226. Note that the disclosed compounds read on the claims when y_1 and y_2 are both hydrogen atoms. In the case of claim 23, the reference discloses compound 4 at page 4227, which reads on the claim when y_1 and y_2 are both hydrogen atoms.

Allowable Subject Matter

6. Claims 1-15, 17, 18, 21, 22, 24-43, 45 and 46 are allowed.
